- Add Module at Both Ends
- Flip Module
- Delete Module
- Zoom to Width
- Zoom to Height

SloanLED Layout Estimator User Guide
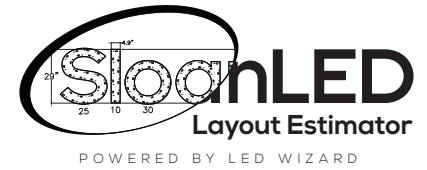

Sign Cabinet/Box Mode

For single-sided SignBOX II layouts: The lowest number of rows is optimal for SignBOX II layout designs. Use the height/width that is smallest to determine the direction of the product.

For double-sided SignBOX II layouts: Layout the SignBOX II product vertically for heights of 42" (1067 mm) or higher, as a vertical layout is easier to install. Layout the SignBOX II product horizontally when the height is less than 42" (1067 mm).
