## Density Guidelines

Model	Cabinet depth	mm on center	Watts per module
SignBOX II Single-sided	127-305 mm	305 mm	0.90 W
SignBOX II Double-sided	254-610 mm	305 mm	1.80 W

### Notes:

- 1) All SignBOX II products have 10 modules per meter. Optimal mounting position for illumination is 203 mm from the face.
- 2) To minimize the potential for shadows/hot spots in applications when using frame support tubes/poles; mount modules or frame support tubes such that the tubes are centered in between modules and at a depth that will not directly interfere with the beam angle of the LEDs. Use SignComp Adjustable Frame Brace (P/N: 5357) or equivalent.
- 3) It is recommended that you first test the LED density in a sample cabinet to evaluate brightness, uniformity, and color.
- 4) Should you have questions or require assistance in testing, please contact your SloanLED customer service representative.
- 5) Products can be used in can depths deeper or shallower than listed above, but testing is recommended.
- 6) The acrylic material used for all testing was 4.8 mm thickness sign grade 2447 acrylic.
